

Dear Fellow Concerned and Questioning Americans,

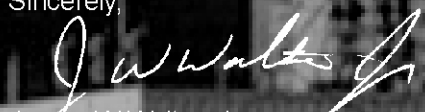

I was astounded by the book **"Painful Questions"** about the 9/11 NY terrorist attack, by Eric Hufschmid. Researchers have confirmed the following:

- ✈ **"The WTC was probably one of the more resistant tall buildings....they just don't build them as tough as the World Trade Center"**
Scientific American, 2001
- ✈ **"No steel building has ever been destroyed by fire."** Fire Engineering Magazine.
- ✈ **"The specifics of the fires in WTC 7 and how they caused the building to collapse remain unknown at this time."** FEMA.
- ✈ **"The investigation of the WTC is a half-baked farce."** - Fire Engineering Magazine.
- ✈ **All of the important evidence from the disaster was destroyed, illegally, and before the investigation was even concluded, some before it was begun according to Fire Engineering Magazine.**
- ✈ **\$600,000 was spent investigating the WTC collapses vs. \$40 million on Clinton's sex.**
- ✈ **The South Tower fell after only 1 hour, the North Tower fell 1 hour later. After the initial fireball, neither burned significantly. The Meridian Plaza in Philadelphia burned fiercely for 19 hours and never collapsed.**
- ✈ **Building 7 at the WTC, 44 floors, steel, and constructed differently from the twin towers, fell at 5:30 but it was never hit by an airplane and had no apparent (from photos) significant fire!**
- ✈ **Jet fuel burns at too low a temperature to harm steel (black smoke means it was not even at maximum jet fuel temperature).**
- ✈ **The fires were not long enough (only 1 hour) to harm the steel (Meridian Plaza in Philadelphia burned for 19 hours without collapse).**
- ✈ **Yet days later, there were "hot spots" in the building that still exceeded the maximum temperature possible from jet fuel; but just the right temperature if explosives had been used.**
- ✈ **The gusting wind had at times had greater impact than the airliners. Neither tower bent nor did they creak or groan.**
- ✈ **The buildings collapsed at the maximum speed of gravity - impossible without explosives - each floor would slow the collapse.**
- ✈ **The concrete clouds shooting out of the buildings are not possible from mere collapse; they do occur with explosives.**
- ✈ **All the fires and crashes were way off center; two sides of the building and two sides of the main center support columns were practically untouched. That means that only one half of the building was harmed at most. Yet all three collapses are perfect - straight down. Ask any demolition expert how hard it is to do this with an asymmetrical blast**
- ✈ **"I'm still to this day amazed that he [alleged pilot on Flight 77] could have flown into the Pentagon," according to the hijackers pilot instructor. "He could not fly at all." Yet, "The steep turn was so smooth, the sources say, it's clear there was no fight for control going on. And the complex maneuver suggests the hijackers had better flying skills than many investigators first believed."**
- ✈ **9/11 Public Hearing, Friday, May 23, 2003: Mr. Mineta: "There was a young man who had come in [Presidential Emergency Operating Center] and said to the Vice President [Cheney], "The plane [Flight 77] is 50 miles out. [Later] The plane is 30 miles out." [Later] "10 miles out" Cheney knew this plane was coming at Washington and yet no planes were in position to protect Washington after over 1 hour since the WTC was attacked. Even at 400 miles per hour, it takes over 7 minutes to travel 50 miles, more since the plane was at altitude. Cheney knew the plane was coming when it was even farther away since Mr. Mineta had not been in the room when Flight 77 was first reported to Mr. Cheney.**

F-16's should have formed an umbrella over Washington, DC. An F-16 fighter can travel that distance and destroy a target in less than 2 minutes. Moreover, would not the latest anti-missile Patriot missiles, anti-aircraft missiles, and super high speed machine guns like we see on our navy ships protect the Pentagon? Everything failed! Incompetence, if not guilt.

One thing is for certain; the facts surrounding the WTC collapses and Pentagon attack prove our government is not telling us the whole truth. I shudder to think that what this book seems to prove is true. Ask your friends who are experts on the topics covered. No one can say for sure that Bush knew. I think he's being lied to and led. But I am now convinced that it was not just an error of omission. It seems clear to me that someone executed a master of deception's plan and about 4,000 people. Osama and Bush may just be patsies [people setup to take the blame].

Sincerely,

James W. Walter, Jr.
President, Walden Three, Inc.

P.S. Mr. Hufschmid looks for conspiracies and asks intelligent questions. Secrecy begs questions. Being right or wrong on one issue is not proof of right or wrong on another. Remember that in the legend, the wolf did finally come. Mr Hufschmid unnecessarily complicates things with questions about the Kennedy assassination on which I am not commenting, pro or con. www.erichufschmid.net
