

Dear Fellow Concerned and Questioning Americans,

I was astounded by "Painful Questions", by Eric Hufschmid (www.erichufschmid.net). Researchers confirmed the following:

- ✈ **"The WTC was probably one of the more resistant tall buildings....they just don't build them as tough as the World Trade Center" Scientific American, 2001**
- ✈ **"No steel building has ever been destroyed by fire." Fire Engineering Magazine.**
- ✈ **"The specifics of the fires in WTC 7 and how they caused the building to collapse remain unknown at this time." FEMA.**
- ✈ **The investigation of the WTC "is a half-baked farce." - Fire Engineering Magazine.**
- ✈ **All of the important evidence from the disaster was destroyed, illegally, some before the investigation was begun - Fire Engineering Magazine.**
- ✈ **\$600,000 was spent investigating the WTC collapses vs. \$40 million on Clinton's sex.**
- ✈ **The South Tower fell after only 1 hour, the North Tower fell 1 hour later. After the initial fireball, neither burned significantly. The Meridian Plaza in Philadelphia burned fiercely for 19 hours and never collapsed.**
- ✈ **Building 7 at the WTC, constructed differently from the twin towers, was never hit by an airplane and had no apparent significant fire!**
- ✈ **Jet fuel burns at too low a temperature to harm steel (black smoke means it was not even at maximum jet fuel temperature). The fires were not long enough (only 1 hour) to harm the steel.**
- ✈ **Yet days later, there were "hot spots" in the building that still exceeded the maximum temperature possible from jet fuel; but just the right temperature if explosives had been used.**
- ✈ **Gusting wind had greater impact than the airliners. Neither tower bent nor did they creak or groan.**
- ✈ **The buildings collapsed at the maximum speed of gravity - impossible - each floor would slow the collapse.**
- ✈ **The concrete clouds shooting out are not possible from mere collapse; they do occur with explosives.**
- ✈ **All the fires and crashes were way off center. That means that only one half of the building was harmed at most. Yet all three collapses are perfect - straight down. Ask any demolition expert how hard it is to do this.**
- ✈ **"I'm still to this day amazed that he [pilot on Flight 77] could have flown into the Pentagon," according to the hijackers pilot instructor. "He could not fly at all." Yet, "The steep turn was so smooth, the sources say, it's clear there was no fight for control going on. And the complex maneuver suggests the hijackers had better flying skills than many investigators first believed."**

One thing is certain; the facts surrounding the WTC and Pentagon attack prove our government is not telling us the whole truth. I shudder to think that what this book seems to prove is true. I am now convinced that it was not just an error of omission. It seems clear to me that someone executed a master of deception's plan and about 4,000 people. Osama and Bush may just be patsies [people setup to take the blame].

Sincerely,

James W. Walter, Jr.
President, Walden Three, Inc.

P.S. Secrecy begs questions. Mr. Hufschmid looks for conspiracies and asks intelligent questions. Logically, who would be the least afraid of ridicule and the first to discover a conspiracy. Remember that in the legend, the wolf did finally come.
